### Customizable Features

- Route monitoring (on/off route, origin & destination)
- Temperature, humidity, motion sensing and more
- Trailer separated from Driver
- BOL/manifest e-integration
- Insurance premium reduction
- Loss mitigation
- Extensive forensics for Insurance

Monitoring and securing your logistics fleet is effortless with the help of Insurlock's real-time monitoring system. Each system is backed by our 24/7 monitoring service providing your team with prompt notification of emergent security risks.

The smart seal technology allows for active monitoring of your manifest. Immediate alerts are provided if the load has been compromised or tampered with during transit.

Using biometric voice authentication powered by V2verify, drivers can issue secure commands to update the monitoring personnel of any route changes, stops or deviations.

Automated GPS location updates and system status updates will keep you updated on the progress of your entire fleet.

Save and review reports of each trip for better insights into fleet management and optimization.
